

## 1000°F / 537°C: Very High Temperature & Heat Resistant Fiberglass Braided Texturized Rope with Stainless Mesh Core

This rope starts with a stainless steel mesh core, providing a resilient push-back for applications such as kiln and lab oven doors.

The stainless rope core is then overbraided with a high quality type E fiberglass texturized yarn that will not burn and will withstand continuous exposure to temperatures of 1000°F / 537°C.

This material resists most acids and alkalis and is unaffected by most bleaches and solvents. It is highly flexible and conformable.

The texturized yarn provides high bulk to the rope shell.

1000°F / 537°C continuous rating, high insulation value & excellent personnel protection
