

Extreme Temperature Heat Flame Resistant Silica Tape

An alternative to asbestos and ceramic based textiles. Highly flexible and minimal shrinkage. High abrasion resistance and tensile strength. Melts above 3000°F / 1648°C. Available with a PSA (pressure sensitive adhesive) to facilitate easy installation (*see note). Produced from an extremely pure silica base fiber (SiO₂) and can be used at 2300°F / 1260°C continuously with excursions to 3000°F / 1650°C.

Extreme Temperature Heat Flame Resistant Silica Tapes						
0.090" / 2.3mm Thick Tape – 25 or 50 foot roll
