

High Temperature Heat Resistant Rubberized Fiberglass Universal Gasket Fabric (tacky cloth): With or Without Wire Insert

This is a widely used and universal fabric for making gaskets, especially where a rough or uneven surface or flange exists. The fabric is a fiberglass base with a special white rubber formulation. The fabric is tacky, and has a plastic film surface covering that is removed before installation. The fabric will stick to itself once the film is removed.

To prevent sticking, a dusted 2-side version of the fabric is available.

For added lubrication, higher contact temperature workability and electrical conductivity, a graphite coated version is available.

To facilitate installation instructions for end users, (for non symmetrical gaskets, etc.) the fabric is available with a Red/Black side (graphite on the black side).

Wire Inserted Version: The fill (widthwise) yarn for this version of the fabric has a twisted brass wired formed with it, providing additional strength and electrical conductivity/shielding.

550°F / 287°C continuous rating, excellent sealing properties as a gasket material

This fabric can used to build complex covers and shields for equipment panels, also providing high EMI/RFI shielding.

High Temperature Universal Gasket Fabric (Tacky Cloth)						
Part Number	Thickness in / mm	Feet / Metres per Roll	Price per Yard By Thickness: A / B / C / D			
			"A" Frictioned Tacky	"B" Dusted Both Sides	"C" Graphite Both Sides	"D" Red & Black
Gasket Cloth with Wire Insert
