

## High Temperature Heat Resistant Rubberized Fiberglass Universal Gasket Tape (tacky cloth): With or Without Wire Insert

This is a widely used and universal tape for making gaskets, especially where a rough or uneven surface or flange exists. The tape is a fiberglass base with a special white rubber formulation. The tape is tacky, and has a plastic film surface covering that is removed before installation. The tape will stick to itself once the film is removed.

**Wire Inserted Version:** The fill (widthwise) yarn for this version of the fabric has a twisted brass wired formed with it, providing additional strength and electrical conductivity/shielding.

550°F / 287°C continuous rating, excellent sealing properties as a gasket material

High Temperature Rubberized Fiberglass Universal Gasket Tape (Tacky Cloth)						
Part Number	Width in / mm	Price per Foot By Thickness: A / B / C / D / E				
		in / mm				
		"A" .062 / 1.6	"B" .125 / 3.2	"C" .187 / 4.8	"D" .250 / 6.3	"E" .375 / 7.9
